

## PRESS RELEASE

In order to inform investors the company's management announced that following the decision of the BoD of ASE on 07.04.2011, our company's shares were included in the surveillance category from Friday 08.04.2011.

The reasons for their inclusion concerned the overdue obligations and the recording of losses of more than 30% of equity, without parallel convening the General Meeting for the share capital increase.

With regards to the existing overdue obligations, as these appear in the financial statements as at 31/12/2011, they have already been covered with the issuance and coverage of the debenture loan of EUR 26,450,000. This change is already reflected in the published financial statements.

With regards to the second reason, the management has taken all necessary actions for the recovery of the financial results of the group.
